

Biolink FOLIAR SPRAY

Plant-Microbial Stimulate

***Biolink Foliar Spray* is a microbial blend that:**

- ⇒ Increases cell division and enlargement
- ⇒ Stimulates the synthesis of protein, nucleic acid and chlorophyll
- ⇒ Increases the uptake of mineral nutrient in soil
- ⇒ Increase svalues of proteins, higher values of vitamins - especially vitamin B which plays an important role in improving plant growth and controlling the incidence of fungal diseases.

How do you prepare and apply *Biolink Foliar Spray*?

As *Biolink Foliar Spray* is a biological blend of live microbials, it's important to avoid mixing it with herbicides and pesticides.

Mix 2 kgs of the blend to every 100 litres of water. Blend separately from your spray tank. Mix through so all ingredients other than residual are in a water solution. Filter into spray tank through a fine mesh filter (300 mesh) - or use an old stocking. Distribute the residual on your garden or compost heap for a microbial boost. Apply 100 litres per hectare.

Product packs

Biolink Foliar Spray comes in 20 kg bags available in half tonne and 1 tonne lots. Each 20kg bag will treat 10 hectares.

You need to apply *Biolink Foliar Spray* at least twice in the growing season; firstly after the emergence of your plant/crop, then two to three weeks after that.

What does it cost?

Cost per application is \$35 per hectare; after two applications the total outlay is \$70 per hectare. Discounts are available for large lots (\$30 per hectare).

BioLink4Plants is an Australian company run by experienced farmers.
